

ABSTRACT OF THE DISCLOSURE

Figure 1 consists of 12 scatter plots, labeled (a) through (l), each showing the relationship between a specific variable and the number of children. The y-axis for all plots is 'Number of children'.

- (a) Age: Shows a positive correlation, with the number of children increasing as age increases.
- (b) Sex: Shows a positive correlation, with the number of children increasing as the sex of the parent increases.
- (c) Education: Shows a negative correlation, with the number of children decreasing as education level increases.
- (d) Income: Shows a positive correlation, with the number of children increasing as income increases.
- (e) Religion: Shows a positive correlation, with the number of children increasing as religion increases.
- (f) Ethnicity: Shows a positive correlation, with the number of children increasing as ethnicity increases.
- (g) Marital status: Shows a positive correlation, with the number of children increasing as marital status increases.
- (h) Employment: Shows a positive correlation, with the number of children increasing as employment increases.
- (i) Health: Shows a positive correlation, with the number of children increasing as health increases.
- (j) Social capital: Shows a positive correlation, with the number of children increasing as social capital increases.
- (k) Parental involvement: Shows a positive correlation, with the number of children increasing as parental involvement increases.
- (l) Parental satisfaction: Shows a positive correlation, with the number of children increasing as parental satisfaction increases.
